Apostolos Lagonikas

Piraeus 18546 | +30 6978226516 apostoloslagwnikas@gmail.com | github.com/otolis

Profile

I am very passionate about learning and constantly improving my skills. I have a strong foundation in computer science and hands-on experience with various programming languages and frameworks through both academic work and professional experience. I enjoy building functional and user-friendly applications, and I am eager to contribute to collaborative development environments.

Experience

Software Engineer | **REDIRECT** *September 2025 – Present | Remote / Hybrid*

- Focusing on software engineering principles and .NET development.
- Contributing to the development of scalable solutions and engineering workflows.

Assistant Warehouse Operations Manager | **Pantelis K. Donoupoglou SA** *June 2024 – June 2025*

- Managed daily warehouse operations to ensure efficiency and accuracy.
- Facilitated team collaboration and coordinated workflows to meet operational targets.

Technical Skills

- **Proficient:** C#, JavaScript, React, Flutter, Node.js, Python, Umbraco, Firebase, Vite, HTML, CSS, Git, NPM, Webpack, RESTful API.
- **Intermediate:** PHP, SQL, C, C++, WordPress.
- **Operating Systems:** Windows, Linux.

Projects

Flash Chat Flutter *Technologies: Flutter, Firebase, Dart* github.com/otolis/FlashChatFlutter

- Developed a modern, real-time messaging application using Flutter for the frontend and Firebase for the backend.
- Implemented secure user authentication and cloud-based data storage (Firestore) to enable instant message synchronization across devices.
- Designed a responsive and fluid user interface providing a native experience on mobile platforms.

Spotify Album Finder *Technologies: React, Vite, RESTful API, CSS*
github.com/otolis/SpotifyAlbumFinder

- Built a dynamic web application that allows users to search for artists and browse albums using the Spotify Web API.
- Utilized Vite for a fast and optimized development environment and React for efficient state management.
- Implemented asynchronous data fetching and error handling to ensure a smooth user experience.

Message Board *Technologies: Node.js, Express, MongoDB, EJS, JavaScript, HTML, CSS*
github.com/otolis/messageBoard

- Built a full-stack message board application allowing users to register, log in, and post messages.
- Utilized Express for routing, MongoDB for data persistence, and EJS templates for server-side rendering.
- Implemented RESTful routes, form validation, and secure password handling with bcrypt.

Education

Bachelor's degree – Software Development *Hellenic Open University (Remote)* October 2024 – Present

Bachelor's degree – Web Development *IEK DELTA 360* October 2023 – June 2025

Certifications

- **ECCE (Michigan Lower)** – Level B2 English language certificate
- **FCE (Cambridge Lower)** – Level B2 English language certificate

Other Skills

- Deep understanding of programming concepts and best practices.
- Proficiency with front-end frameworks and libraries (e.g., React).
- Hands-on experience with modern development tools (e.g., Webpack, Jest).
- Strong organizational and communication skills.
- Highly adaptable with a commitment to continuous learning.
